Course Objectives and Outcomes of I-BHMS

SUBJECT CODE : BH101

NAME OF THE COURSE : Anatomy

YEAR : I BHMS

LEARNING OBJECTIVES :

1.3.1 Knowledge :

At the end of the year student must:

- 1) Have complete knowledge of anatomical features of the organs and organ systems
- 2) Know the location of various organs in the body.
- 3) Have complete knowledge of actions of various joints.
- 4) Have knowledge of applied anatomy.

OUTCOME :

At the end of the year student is able to:

1. Explain the anatomy of each organ and organ system.
2. Locate the various structures of the body
3. Demonstrate the action of various joints
4. Co-relate the knowledge of anatomy with the various diseases of the body.

1.3.2 SKILLS : At the end of the course student shall be able to –

- I) Identify and locate all the structures of the body and mark the topography of the living anatomy.
- II) Identify the organs and tissues under the microscope.

III) Preparation & mounting of Museum specimens.

SUBJECT CODE-- BH 102

NAME OF COURSE—Physiology Including Biochemistry

YEAR—First BHMS

1.3 Objectives –

1.3.1 To know normal functioning of cells & tissues.

1.3.2 To have complete knowledge of normal metabolism.

Outcome-

At the end of the course the student will be able to:

1.3.1.1 Must be able to enumerate standards of normal physiological processes.

1.3.1.2 Must be able to apply normal standards in disease.

1.3.1.3 Must be able to perform experiments for assessment of functions.

1.3.2.1 Make use of conventional techniques & instruments to perform biochemical analysis relevant to clinical screening and diagnosis, analyse and interpret investigative data.

Subject code- BH103

Name of course- Homoeopathic Pharmacy

Year/ semester- I BHMS

1.3 Learning Objectives and Outcomes-

Course objective 1- At the end of the course, I-BHMS students must be able to prepare homoeopathic medicines.

Course Outcomes: At the end of the course, I-BHMS students

a. Cognitive Domain

- 1.1 Must have knowledge of different processes involved in potentiation.
- 1.2 Must be able to select appropriate vehicle for preparation of homoeopathic medicine.

b. Psycho-motor domain

- 1.3 Must be able to demonstrate the different processes involved in preparation of homoeopathic medicines.

Course Objective 2- At the end of the course, I-BHMS students must be able to write an ideal prescription.

Course Outcomes: At the end of the course I-BHMS students

Cognitive Domain

- 2.1 Must have complete knowledge of the different parts of an ideal prescription.
- 2.2 Must have complete knowledge of the importance of each part of an ideal prescription.
- 2.3 Must have complete knowledge of the abbreviations used while writing an ideal prescription.

Psycho-motor Domain

- 2.4 Must be able to write an ideal prescription

Affective Domain

- 2.5 Follow the code of ethics while writing a prescription

Course Objective 3- At the end of the course, I-BHMS students must be competent to prescribe the indicated medicine in correct potency and dosage.

Course Outcomes: At the end of the course, I-BHMS students

Cognitive Domain

- 3.1 Must have complete knowledge of the different criteria for selection of potency.
- 3.2 Must have complete knowledge of the dose and criteria for repetition of doses.

Psycho-motor

- 3.3 Must be able to select the correct potency for a particular case.
- 3.4 Must be able to design the dosage and repetition of doses for a particular case.

Course Objective 4- At the end of the course, I-BHMS students must be able to dispense the homoeopathic medicines.

Course Outcomes: At the end of the course, I-BHMS students

a. Cognitive Domain

- 4.1 Must have knowledge of the different forms of dispensing of homoeopathic medicines.
- 4.2 Must have complete knowledge of vehicles used for dispensing of homoeopathic medicines.

b. Psychomotor Domain

- 4.3 Must be able to prepare dose of homoeopathic medicine.
- 4.4 Must be able to medicate the globules for dispensing.
- 4.5 Must demonstrate the art of taking minims.

Subject Code : BH 104

Name of Course: Homoeopathic Materia Medica

Year/Semester: Ist BHMS

1.1 Educational Objectives:

1. Comprehensive training in the *theory* of Homoeopathic Materia Medica (science, philosophy and construction).
2. To *simplify the understanding of symptomatology with the help of teaching a drug* and develop students *analytical abilities for the study of comparative materia medica*.

1.1.1 Knowledge: At the end of the course.....

Year	
I BHMS	Basic Concept, Construction, Definition, Classification, Sources & Understanding of Homoeopathic Materia Medica

1.1.2 Skills: At the end of the course.....

Each student should achieve basic objective to understand the language of the disease and drug.

Year	Skill
I BHMS	Difference between objective & subjective symptom, Formation of Complete symptom

Subject Code – BH105

Name of course – Organon & Homoeopathic Philosophy

Year – I BHMS

1.3 Educational Objectives & Outcomes:

1. Objective:

At the end of the course, the student should know developments in medical science since ancient times and, discovery and developments in homoeopathic science and philosophy.

Outcomes: Student must be able to

c. Cognitive Domain

- 1.1 Describe the history of medical science from pre-historic to Hahnemannian era.
- 1.2 Describe the contributions of stalwarts of Homoeopathy.
- 1.3 Describe spread of homoeopathy in various parts of world.
- 1.4 Describe Editions of Organon Of Medicine by Dr. Samuel Hahnemann

2. Objective :

At the end of the course, the student should know the homoeopathy as holistic, individualistic and dynamistic therapeutic science

Outcomes: Student must be able to

a. Cognitive Domain

- 2.1 Explain the concepts given in aphorisms 1 to 28 of 6th Edition of Organon of Medicine by Dr Hahnemann.
- 2.2 Comprehend the cardinal principles of homoeopathy and Logic
- 2.3 Explain Concept of prophylaxis in Homoeopathy.

b. Psychomotor Domain

- 2.4 Apply the concept of Symptomatology, Concepts of Health, Disease and Cure practically.
- 2.5 Logically apply Aphorisms and Symptomatology practically.

3. Objective

At the end of the course, the student should know the basic psychological concepts.

Outcomes: Student should be able to

a. Cognitive Domain

- 3.1 Explain definition of Psychology, basic behaviour, Intelligence, Memory.
- 3.2 Know the scope of psychology and its relevance to homoeopathy.

MD (HOM): COURSE OBJECTIVES & OUTCOMES

1. At the end of course student must be able to develop the skill of case taking.

OUTCOMES: At the end of the course the student shall be able to

- 1.1 Demonstrate case taking both acute and chronic cases and demonstrate empathy and formation of Doctor-Patient Relationship.
- 1.2 Communicate and interact with patients and their attendants.

2. At the end of course student must be able to develop critical thinking for case processing.

OUTCOMES: At the end of the course the student shall be able to

- 2.1 Formulate analysis, evaluation and totality of symptoms of the case.
- 2.2 Present case with scientific reportorial and non reportorial approach.

3. At the end of course student must be able to plan the management of the case.

OUTCOMES: At the end of the course the student shall be able to

- 3.1 Prescribe indicated remedy with potency and repetition as per susceptibility of the case with explanation
- 3.2 Advise required investigations in the case
- 3.3 Advise diet and regimen as per the case
- 3.4 Use various assessment methods and scales to measure follow ups/analysis
- 3.5 Explain proper understanding of Follow-up analysis and must be able to justify action

4. At the end of course student must be able to develop competence in research methodology and epidemiology, and be able to critically analyze relevant published research literature.

OUTCOMES: At the end of the course the student shall be able to

- 4.1 Demonstrate synopsis & Dissertation writing, with relevant review of literature, assessment tools, utilization of research database and evidences of clinical records.
- 5. Develop skills in using educational methods and techniques as applicable to the teaching of medical/nursing students, general physicians and paramedical health workers.

OUTCOMES: At the end of the course the student shall be able to

- 5.1 Demonstrate preparation of proper lesson plan and power point presentation
- 5.2 Teach Students appropriately fulfilling the criterias of Microteaching
